DIY Draught Proofing Solutions

Smarter Sealing for Warmer, Quieter, More Efficient Homes

Keeping warmth in and unwanted draughts out has never been more important. Our comprehensive range of DIY draught proofing products are designed to help homeowners, landlords and trade professionals improve comfort, reduce energy loss and create better-performing living spaces with simple, effective solutions.

From high-quality draught proofing profiles to durable brush strips and professional display stands, every product in this catalogue has been selected for performance, reliability and ease of installation. Whether upgrading existing doors and windows or fitting out new projects, our range offers practical solutions that combine functionality with a clean, professional finish.

Energy Saving & Improved Comfort

Draughts around doors, windows and letterboxes can significantly reduce energy efficiency and increase heating costs. Our sealing profiles and brush strips help minimise heat loss by creating effective barriers against cold air, moisture, dust and noise. The result is a warmer, quieter and more comfortable home environment all year round.
